1. Read the passage given below :

- 1 Seagulls, as you know, never falter, never stall. To stall in the air is for them a disgrace and a dishonour. But Jonathan Livingston Seagull, unashamed, stretching his wings again in that trembling hard curve — slowing, slowing, and stalling once more — was no ordinary bird. Most gulls don't bother to learn more than the simplest facts of flight — how to get from shore to food and back again. For most gulls, it is not flying that matters, but eating. For this gull, though, it was not eating that mattered, but flight. More than anything else, Jonathan Livingston Seagull loved to fly.
- 2 This kind of thinking, he found, is not the way to make oneself popular with other birds. Even his parents were dismayed as Jonathan spent the whole day alone, making hundreds of low-level gliders, experimenting. “Why, Jon, why ?” his mother asked. “Why is it so hard to be like the rest of the flock, Jon ? Why can't you leave low flying to the pelicans, the albatross ? Why don't you eat ? Son, you're bone and feathers !” “I don't mind being bone and feathers, mom. I just want to know what I can do in the air and what I can't, that's all. I just want to know.” “See here, Jonathan,” said his father, not unkindly. “Winter isn't far away. Boats will be few, and the surface fish will be swimming deep. If you must study, then study food, and how to get it. This flying business is all very well, but you can't eat a glide, you know. Don't you forget that the reason you fly is to eat.”
- 3 Jonathan nodded obediently. For the next few days he tried to behave like the other gulls; he really tried, screeching and fighting with the flock around the piers and fishing boats, diving on scraps of fish and bread. But he couldn't make it work. It wasn't long before Jonathan Gull was off by himself again, far out at sea, hungry, happy, learning. The subject was speed, and in a week's practice he learned more about speed than the fastest gull alive. Time after time it happened. Careful as he was, working at the very peak of his ability, he lost control at a high speed. The key, he thought at last, dripping wet, must be to hold the wings still at high speeds — to flap up to fifty and then hold the wings still.

- 4 From two thousand feet he tried again, rolling into his dive, beak straight down, wings full out and stable from the moment he passed fifty miles per hour. It took tremendous strength, but it worked. In ten seconds he had blurred ninety miles per hour. Jonathan had set a world speed record for seagulls ! But victory was short-lived. The instant he began his pullout, the instant he changed the angle of his wings, he snapped into the same uncontrollable disaster, and at ninety miles per hour it hit him like dynamite. Jonathan Seagull exploded in midair and smashed down into a brick-hard sea. As he sank low in the water, a strange hollow voice sounded within him. There's no way around it. I am a seagull. I am limited by my nature. If I were meant to learn so much about flying, I'd have charts for brains. If I were meant to fly at speed, I'd have a falcon's short wings. Short wings. *A falcon's short wings ! That's the answer ! What a fool I've been ! All I need is a tiny little wing, all I need is to fold most of my wings and just fly on the tips along. Short wings !*

2. Read the passage given below :

- 1 Fast-Moving Consumer Goods (FMCG) are products that sell quickly at relatively low cost. FMCG is the fourth-largest sector in the Indian economy. There are three main segments in the sector — food and beverages, which accounts for 19% of the sector; healthcare, which accounts for 31% of the share; and household and personal care, which accounts for the remaining 50% share. The urban segment contributes to about 55% of the revenue share, while the rural segment accounts for 45%. Rise in rural consumption will drive the FMCG market. The Indian processed food market is projected to expand to US\$ 470 billion by 2025, up from US\$ 263 billion in 2019 – 20.
- 2 The Indian FMCG industry grew by 16% in 2021, a 9-year high, despite nationwide lockdowns, supported by consumption-led growth and value expansion from higher product prices, particularly for

staples. Real household spending is projected to increase 9·1% after 2021, after a decrease of 9·3% in 2020 due to the economic impact of the pandemic. Price increase across product categories will offset the impact of rising raw material prices, along with volume growth and resurgence of demand for discretionary items.

- 3 The FMCG sector has received good investments and support from the Government in the recent past. The sector witnessed healthy FDI inflows from April 2000 – March 2022. Furthermore, as per the Union Budget 2022 – 23, a substantial amount has been allocated to the Department of Consumer Affairs, an increased amount has been allocated to the Department of Food and Public Distribution. In 2021 – 22, the Government approved Production-Linked Incentive Scheme for Food Processing Industry (PLISFPI) with an outlay of a larger amount to help Indian brands of food products in the international markets.
- 4 The Government's Production-Linked Incentive (PLI) Scheme gives companies a major opportunity to boost exports. The future outlook of the FMCG rural sector looks on track now. Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. The growth of organised sector in FMCG is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail.

1. Read the passage given below :

- (1) When we think of the game of cricket, we come to the conclusion that it is primarily a game that depends on outstanding physical activities, good hand-eye co-ordination, speed, skill and strength. It provides entertainment and generates strong feelings of excitement. A good match of cricket or of any other game neither adds to the existing stock of human knowledge nor reveals any secret of existence. It does not carry any deep meaning but most people, particularly the lover of sports attach deep emotions and numerous meanings to it. Games are thought of as a metaphor for life. They are supposed to teach many lessons. In fact, more is said and written about a cricket match than about scientific findings or great philosophy.
- (2) This is because games, like a morality play, in which settings and rules are made by us, can easily make people test their fair and foul conduct, principles of reward and punishment, and emotions of joy and disappointment. They can make us experience the thrill of war without exposing us to its dangers. A man watching a cricket match on T.V. and munching popcorn is like a surrogate warrior. In fact, games provide us with a safe outlet for our aggressiveness. If games become aggressive, they lose the very purpose of providing entertainment and purging us of our aggressiveness. They can calm our impatience without creating any conflict.

(vi) With reference to the passage, a spectator is compared to a 'surrogate warrior'.

Choose the option that best describes this phrase :

- (a) a spectator who is paid to watch.
- (b) a spectator who is in pain while watching the match.
- (c) a spectator who enjoys the match as an armchair soldier.
- (d) a spectator who makes judgement about reward and punishment.

(vii) Why does the writer compare games to a morality play ?

(viii) Complete the given sentence with an appropriate inference with respect to the following :

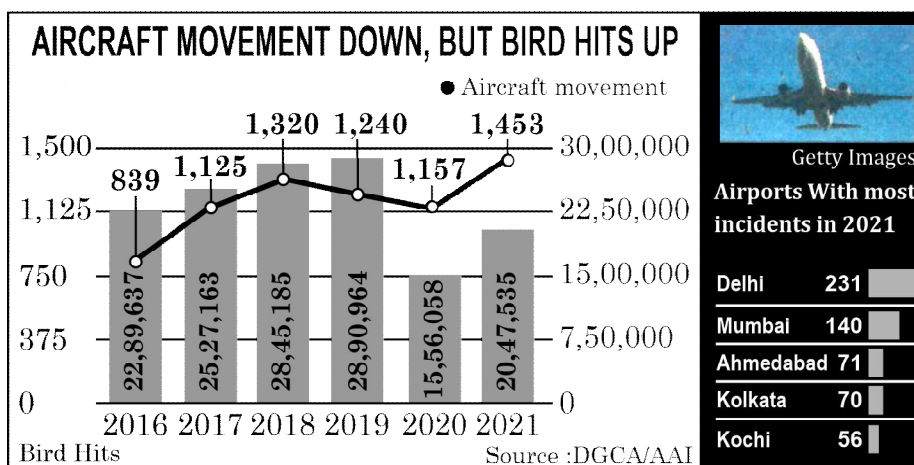

The writer says that games can calm our impatience without creating any conflict by _____.

(ix) The writer advises the players that games should not become aggressive because _____.

2. Read the following report and answer the questions by choosing the correct/most appropriate option :

(1) **How bird hits happen, why they are a concern ?**

New Delhi June 20

At least two bird strike incidents happened on Sunday. Both aircrafts returned to their airports of origin and were grounded for maintenance. An ABC aircraft, which took off from Guwahati towards Delhi, suffered damage to its left engine following a bird hit at 1600 feet. The pilots returned to Guwahati. The other strike happened on another flight from Patna to Delhi. The pilots of the aircraft suspected a bird strike during the take-off roll but continued to climb. Following the take off rotation, they were informed by the cabin crew of sparks emanating from the left engine. Subsequently, the pilots were also informed by air traffic control of smoke coming out of one of the engines. The pilots declared an emergency and returned to Patna.

(2) **Why are bird strikes a concern ?**

Bird strikes are among the most common threats to aircraft safety, and they typically occur during take-off or landing. Dozens of bird-strikes happen each day but some can be more dangerous than others. Typically, when birds collide with an aircraft's airframe, it is unlikely to cause significant problems for the pilots flying. But there are instances when the aircraft engine ingests the birds. This can lead to a loss of thrust for the engine and cause maneuverability problems for the crew. In these cases, where a jet engine ingests a bird, procedures would generally call for pilots to land the plane at the closest airport. While most airframe bird strikes are not considered critical to air safety, if a collision cracks a window or a wind screen, pilots will look to land as early as possible.

(3) **How critical are bird strikes to air safety ?**

Smaller planes would generally be more susceptible to the dangers of bird strikes than larger ones.

However, given that bird strikes mostly happen during take-off and landing, these incidents could distract the pilots during what are highly critical phases of flights that demand the complete attention of the crew.

(4) **What causes bird-strikes ?**

The presence of birds around an aircraft increases the chances of a bird strike. In the monsoon, as water puddles emerge on open grounds attracting insects to breed, the presence of birds increases. In some cases, bird hits also happen at higher altitudes when a plane is cruising. These are more dangerous than the low-altitude hits, given that they can cause rapid depressurization of cabins. Other reasons for bird activity around the air field could be presence of landfills or waste disposal sites that can attract a large number of birds.

1. Read the passage given below :

- 1 As a form of expression, graffiti is famously characterized by outlaw values; the creation and display of graffiti countered societal rules and was considered by some as vandalism. Not only was it symbolic of rebel values but was also linked to destruction of property. These links between graffiti culture and rebellion were age-old and some say, were popularized by hip-hop culture.

- 2 Imagine waking up one morning, to see your walls smeared with black paint — names, symbols, messages. The most interesting bit is that these wall artists were never caught red-handed. It was all done stealthily. It was almost as though people were marking their territory using painted symbols and slogans. The change was creeping in. Mobile numbers and captivating phrases gradually became marketing tools for free advertising. Catchy phrases tickled the curiosity and calls were made to those numbers.

- 3 Over a period of time, there was a shift in perception. Blank walls beckoned invitingly and artists saw whitewashed walls as an opportunity to display their work in free and open settings. The city became one large canvas; the illegal ‘gang activity’ became an art form on display in walking galleries. Graffiti was gradually being replaced and the stigma of illegality was being dropped. There was a move to embrace rather than condemn.

- 4 The colours, shapes, and subjects became cultural themes. What was once rebellious expression is artistic talent at its vibrant best, rich in images of plants, animals and unspoiled landscapes. The painted walls encouraged by residents and governments have created their own ecosystem — a reconciliation of nature with man-made forces.
- 5 The monotony and uniformity of urban life is today infused with human vitality and beauty. Cities speak proudly about the painted walls and clamour to be the first to preserve culture and history through these. Graphic displays of social awareness issues effectively and economically reach out to the common man. Silent art speaks volumes. Be it hygiene, conservation, education, or rights and duties — the message is conveyed in an animated, colourful manner without being an imposition.

She reports her husband as saying to the reporters, “Why do I refuse to be interviewed ? Because it is immoral ! It is a crime, just as much of a crime as an offence against my person, as an assault, and just as much merits punishment. It is cowardly and vile. No respectable man would ask it, much less give it.” Yet Kipling had himself perpetrated such an ‘assault’ on Mark Twain only a few years before. H.G. What is an English poet doing in a film studio which makes Tamil films for the simplest sort of people ? 1. Read the passage given below :

- 1 World Conservation Day is celebrated internationally to increase awareness about the best practices needed to protect our natural resources. The Earth is supplied with a limited amount of resources that we all rely upon, like water, air, soil and trees. The World Nature Conservation Movement is a great opportunity to celebrate the progress we've made and determine to take action, wherever needed. It is time to remind ourselves that we need to give back to nature instead of just using resources without thinking about conservation. There is a need to replenish and recycle the resources we consume from nature.
- 2 Our forests, rivers, oceans and soils provide us with the food we eat, the air we breathe, the water we irrigate our crops with. We also rely on them for numerous other goods and services. We depend on them for our health, happiness and prosperity. We have a cycle of biodiversity which needs proper conservation.
- 3 The population explosion remains one of the major reasons why natural resources are getting depleted at a very fast rate. Technological advancement and luxurious lifestyles have led to several environmental problems like global warming, ozone layer depletion, river water pollution and deforestation, which threaten the planet's future.
- 4 Humans, animals, marine creatures and the environment, all need to be protected and conserved for the planet's future well-being. There are many examples of conservation. One is a programme to try to preserve wetlands, or a programme to try and save old buildings. Another example is of an attempt to minimise the amount of electricity used by turning off lights when leaving a room, or an attempt to turn off the running tap to avoid wastage of water. There are lots of examples like these which need implementation.
- 5 Following these small steps in our daily lives we can help to maintain the balance of nature, thereby saving humankind from the kinds of natural disasters we may face in the near future.
- 6 Nature also has a profound impact on our minds and our behaviour, helping reduce anxiety, brooding, and stress and increase our attention, capacity, creativity and ability to connect with other people. So there is a need to save nature if we want to save life as the two are interconnected and need each other. If we hurt or destroy the environment, surely we will be ruined. We must create awareness among family members, and try and practise a sustainable lifestyle to protect and conserve nature.

Based on your understanding of the passage, answer the questions given below : 10×1=10

2. Read the passage given below :

- 1 Nowadays companies demand an outstanding job performance by every single employee to be better than that of their competitors because there is competition among enterprises. The employers make efforts to motivate the employees and optimise performance.
- 2 There are numerous factors affecting job performance. These can be divided into external and internal factors. The internal factors are team spirit, competent boss, respect from colleagues and job satisfaction. The external factors are chance for personal development, job security, promotion prospects and monetary incentives. The decisive determinant is that the employees remain highly motivated. One possible method to increase motivation is the salary. Employees are willing to stay longer hours in the office and perform better, when they have the chance to get financial rewards, for instance, a higher salary or bonuses.
- 3 The bar graph (given below) shows the result of a survey conducted among workers in a company to analyse their work performance across ten different factors that contribute to make their work environment pleasant. The workers are grouped into two categories — those between the ages of 18 – 30 and those between 45 – 60. Interestingly, in six out of the ten factors surveyed, the 18 – 30 age group is shown to be more affected than the 45 – 60 age group. Factors, besides the salary, which affect the work performance of the two different age groups are interesting. These factors are the chance for personal development, relaxed working environment, promotion prospects, job satisfaction and monetary incentives. Furthermore, two out of the remaining four factors namely, team spirit and work environment have been equally influential among the two groups. The 45 – 60 years workers are impacted a lot by ‘respect from colleagues’ whereas the prospect of a promotion is an important reason that drives younger employees to work better.

- 4 Job performance of happy employees is 31% more productive and they show three times more creativity than their unhappy counterparts. They are more resilient and more likely to stay in the same company for a longer period. Consequently they drive the company towards long-term goals by being more productive and efficient.

SECTION – A Reading Skills

1. Read the passage given below :

- (1) I know many friends of mine who drink coffee regularly but do not know that coffee exists in different forms other than instant coffee. There are many who swear by Flora café classic or Coco gold, which they consider premium coffee. I may sound offensive but instant coffee is not the only way; in fact it's a very bad way of making coffee ! Instant coffee cannot match up to brewed coffee's flavour nor does it have Arabica beans. It uses Robusta beans that are lower in flavour. Don't know the difference ? ! Read on ...
- (2) That plant might be a genius ! It created a chemical that would keep pests away. Fortunately for us and unfortunately for the plant – that plan did not work the way it was intended to. The chemical might have averted a few pest attacks, but attracted a far greater threat – human beings. The plant I am talking about is coffee and the chemical is caffeine.
- (3) To begin from the beginning – coffee is from a more mature part of the tree – the seed – unlike other stimulants. The ripe berry is picked and de-pulped leaving us with a seed called 'green bean' or 'green coffee'. Green bean is uncharacteristically bland with a taste nowhere close to that of coffee, but it is valued for its higher antioxidant levels.

- (4) It's an interesting phenomenon to see how this bland green bean turns to a flavourful coffee bean. Coffee bean is a seed and like any other seed is rich in proteins, fats and all necessary ingredients for giving birth to a new plant. When exposed to heat, the fats and carbohydrates in the bean turn into essential oils, which give the characteristic taste and aroma to the coffee bean. The degree of roasting depends on the need or purpose of use.
- (5) These beans are ground so that the surface area of the bean is increased, which makes extraction easier. The bean can be ground or crushed but making the particles uniform will ensure equal extraction, or else the smaller particle will get over extracted and the larger one under extracted. Hence, the burr grinder is used to ensure that the coffee bean gets ground in a uniform way in which all particles are of similar sizes.
- (6) Does under extraction give a lighter coffee and over extraction a stronger one ? No. For a lighter or stronger coffee less or more coffee powder has to be used. Why ? Under extraction will not get all the flavours of the coffee as the water runs too quickly. It will not get what you want – it will taste sour. Over-extraction will bring out all unnecessary flavours rendering the taste bitter.

On the basis of your understanding of the above passage, answer the questions given below :

10 × 1 = 10

- (i) Complete the sentence by choosing an appropriate option.

The author complained that his friends _____.

- (a) consumed only Flora classics.
(b) were not aware of different forms of coffee.
(c) were severely addicted to drinking coffee.
(d) considered Coco gold as premium coffee.

2. Read the passage given below :

- (1) News – If you can't remember the last time, you saw a teenager reading a book, newspaper or magazine, you're not alone. In recent years, less than 20 percent of teens report reading a book, magazine or newspaper daily for pleasure. More than 80 percent say they use social media every day, according to research published by the World Psychological Association.
- (2) "Compared with previous generations, teens in the 2010s spent more time online and less time with traditional media, such as books, magazines and television," said lead author of the book *yGen* and professor of psychology at ABC University. "Time on digital media has displaced time once spent enjoying a book or watching TV."
- (3) Swaner and her colleagues analysed data concluded from an ongoing study of a nationally representative sample of approximately 50,000 eighth, tenth and twelfth grade students annually. They looked at survey results from 1976 to 2016, representing more than 1 million teenagers. While the study started with only twelfth-graders in the 1970s, eighth- and tenth-graders were added in 1991.
- (4) Use of digital media increased substantially from 2006 to 2016. Among twelfth-graders, internet use during leisure time doubled from one to two hours per day during that period. It also increased 75 percent for tenth-graders and 68 percent for eighth-graders.
- (5) "In the mid-2010s, the average twelfth-grader reported spending approximately two hours a day texting, just over two hours a day on the internet – which included gaming – and just under two hours a day on social media," said Swaner. That's a total of about six hours per day on just three digital media activities during their leisure time."
- (6) In comparison, tenth-graders reported a total of five hours per day and eighth-graders reported four hours per day on those three digital activities. Consequently the spent time in the digital world is seriously degrading the time they spend on more traditional media such as print book and newspapers.

- (7) The decline in reading print media was especially steep. In the early 1990s, 33 percent of tenth-graders said they read a newspaper almost every day. By 2016, that number was only 2 percent. In the late 1970s, 60 percent of twelfth-graders said they read a book or a magazine almost every day; by 2016, only 16 percent did. Twelfth-graders also reported reading fewer books each year in 2016 compared to how much they read in 1976, and approximately one-third did not read a book (including e-books) for pleasure in the year prior to the 2016 survey.
- (8) There's no lack of intelligence among young people. However due to over dependence on digital media they find it difficult to focus for long periods of time and to read long-form text. Subsequently they find it challenging to understand complex issues and develop critical thinking skills.
