21. (A)	Single Use plans- A single-use plan is developed for a one-time event or project. Such a course of action is not likely to be repeated in future, i.e., they are for non-recurring situations. The duration of this plan may depend upon the type of the project. It may span a week or a month or a day. Standing plans-A standing plan is used for activities that occur regularly over a period of time. It is designed to ensure that internal operations of an organisation run smoothly. Such a plan greatly enhances efficiency in routine decision-making. It is usually developed once but is modified from time to time to meet business needs as required. OR	1 ½ 1 ½
21. (B)	<b>Planning reduces creativity-</b> Planning is an activity which is done by the top management. Usually the rest of the members just implement these	1 ½

	plans. As a consequence, middle management and other decision makers are neither allowed to deviate from plans nor are they permitted to act on their own.Thus, planning in a way reduces creativity since people tend to think along the same lines as others.	
	<b>Planning leads to rigidity</b> -In an organisation, a well-defined plan is drawn up with specific goals to be achieved within a specific time frame. These plans then decide the future course of action and managers may not be in a position to change it. Following a pre-decided plan, when circumstances have changed, may not turn out to be in the organisation's interest.	1 ½
22. (A)	Leadership is the process of influencing the behaviour of people by making them strive voluntarily towards achievement of organisational goals. Two situations in which Autocratic leadership is most effective:	1
	• This leadership style is effective in getting productivity in many situations like in a factory where the supervisor is responsible for production on time and the supervisor has to ensure labour productivity.	1

24.	(I) <b>Business Environment</b> means the sum total of all individuals, institutions and other forces that are outside the control of a business enterprise but that may affect its performance.	1
	(II) It enables the firm to identify opportunities and getting the first mover advantage: Opportunities refer to the positive external trends or changes that will help a firm to improve its performance. Environment provides numerous opportunities for business success. Early identification of opportunities helps an enterprise to be the first to exploit them instead of losing them to competitors	1⁄2 + 1 1⁄2

25.	<ul> <li>(I) Management is an intangible force: Management is an intangible force that cannot be seen but its presence can be felt in the way the organisation functions. The effect of management is noticeable in an organisation where targets are met according to plans, employees are happy and satisfied, and there is orderliness instead of chaos.</li> <li>(II) Importance of management: (Any three)</li> <li>Management helps in achieving group goals: Management is required not for itself but for achieving the goals of the organisation. The task of a manager is to give a common direction to the individual effort in achieving the overall goal of the organisation.</li> <li>Management increases efficiency: The aim of a manager is to reduce costs and increase productivity through better planning, organising, directing, staffing and controlling the activities of the organisation.</li> <li>Management creates a dynamic organisation: All organisations</li> </ul>	<sup>1</sup> / <sub>2</sub> + <sup>1</sup> / <sub>2</sub>

26. (A)	<ul> <li>Selection tests (Any four):</li> <li>Intelligence Tests: This is one of the important psychological tests used to measure the level of intelligence quotient of an individual. It is an indicator of a person's learning ability or the ability to make decisions and judgments.</li> <li>Aptitude Test: It is a measure of an individual's potential for learning new skills. It indicates the person's capacity to develop.</li> <li>Personality Tests: Personality tests provide clues to a person's emotions, her reactions, maturity and value system etc. These tests probe the overall personality. Hence, these are difficult to design and implement.</li> <li>Trade Test: These tests measure the existing skills of the individual. They measure the level of knowledge and proficiency in the area of professions or technical training. The difference between aptitude test and trade test is that the former measures the potential to acquire</li> </ul>	1X4=4

	acknowledgment with a show of appreciation. When such	1⁄2 + 1				
	appreciation is given to the work performed by employees, they feel					
	motivated to perform/work at a higher level.					
	<ul> <li>Employee Participation: It means involving employees in decision</li> </ul>					
	making of the issues related to them. In many companies, these	1⁄2 + 1				
	programmes are in practice in the form of joint management					
	committees, work committees, canteen committees etc.					
28.(A)	Plans are prepared for the future and are based on forecasts about future	4				
_0.(, ,)	conditions. Therefore, <b>planning</b> involves looking ahead and is called a	•				
	forward-looking function.					
	On the contrary, controlling is like a postmortem of past activities to find out					
	deviations from the standards. In that sense, <b>controlling is a backward</b>					
	<b>looking function.</b> However, planning is guided by past experiences and the corrective action					
	initiated by the control function aims to improve future performance. Thus,					
	planning and controlling are both backward-looking as well as a					
	forward-looking function.

28.(B)	Measurement of Actual Performance: Once performance standards					
	are set, the next step is measurement of actual performance.	1⁄2 + 11⁄2				
	Performance should be measured in an objective and reliable manner.					
	There are several techniques for measurement of performance. These					
	include personal observation, sample checking, performance reports.					
	• Comparing Actual Performance with Standards: This step involves					
	comparison of actual performance with the standard. Such comparison	1⁄2 + 11⁄2				
	will reveal the deviation between actual and desired results. Comparison					
	becomes easier when standards are set in quantitative terms.					
29.	Features of Planning					
20.	(1) <b>Planning focuses on achieving objectives:</b> Organisations are set up					
	with a general purpose in view. Specific goals are set out in the plans	1				
		I				
	along with the activities to be undertaken to achieve the goals. Thus,					
	planning is purposeful. Planning has no meaning unless it contributes to					
	the achievement of predetermined organisational goals.					

	<ul> <li>(2) Planning is futuristic: Planning essentially involves looking ahead and preparing for the future. The purpose of planning is to meet future events effectively to the best advantage of an organisation. It implies peeping into the future, analysing it and predicting it. Planning is, therefore, regarded as a forward looking function based on forecasting.</li> <li>(3) Planning involves decision making: Planning essentially involves choice from among various alternatives and activities. The need for planning arises only when alternatives are available. In actual practice, planning presupposes the existence of alternatives. Planning, thus, involves thorough examination and evaluation of each alternative and choosing the most appropriate one.</li> <li>(4) Planning is a mental exercise: Planning requires application of the mind involving foresight, intelligent imagination and sound judgement. It is basically an intellectual activity of thinking rather than doing, because planning determines the action to be taken. However, planning requires logical and systematic thinking rather than guesswork or wishful thinking.</li> <li>30. 34. (A) Following are the four elements of marketing mix:	
1. <b>PRODUCT:</b> Product means goods or services or 'anything of v	alue',
which is offered to the market for sale. The concept of product rela	tes to 1/2 + 1
not only the physical product but also the benefits offered by it	from
customer's view point. It also includes the extended product or w	
offered to the customers by way of after sales services, ha	
complaints, availability of spare parts etc. The important pr	<b>U</b>
decisions include deciding about the features, quality, packa	
labelling and branding of the products.	.99,
2. <b>PRICE</b> : Price is the amount of money customers have to pay to o	htain
the product. In the case of most of the products, the level of price a	
the level of their demand. The marketers have not only to decide	
the objectives of price setting but to analyse the factors determining	•
price and fix a price for the firm's products. Decisions have also	
taken in respect of discounts to customers, traders and credit terms	
so that customers perceive the price to be in line with the value	or the
product.	
3. <b>PLACE:</b> Place or Physical Distribution include activities that m	
firm's products available to the target customers. Important de	
areas in this respect include selection of dealers or intermediar	
reach the customers, providing support to the intermediaries (by v	-
discounts, promotional campaigns, etc.). The other decision areas	relate
to managing inventory, storage and warehousing and transportat	on of
the goods from the place it is produced to the place it is required l	by the
buyers.	
4. <b>PROMOTION:</b> Promotion of products and services include activitie	s that
communicate availability, features, merits, etc., of the products	o the
target customers and persuade them to buy it. Most mar	
organisations use a number of tools such as advertising, per	
selling and sales promotion techniques like price discounts	
coupons etc.	
OR	
34. (B) Factors affecting price of a product: (any four)	
1. <b>Product Cost:</b> One of the most important factors affecting the pric	
product or service is its cost. This includes the cost of producing, distril	-
and selling the product. The cost sets the minimum level or the floor pl	
which the product may be sold. In the long run, a firm cannot survive u	
at least all its costs are covered. There are broadly three types of cos	s: viz $\binom{1}{2} + 1$
Fixed Costs, Variable Costs and Semi Variable Costs.	x 4
2. The utility and demand: While the product costs set the lower lin	its of
the price, the utility provided by the product and the intensity of dema	
the buyer sets the upper limit of price, which a buyer would be prepa	
pay. The buyer may be ready to pay up to the point where the utility fro	
product is at least equal to the sacrifice made in terms of the price paid	

3. Extent of competition in the market: The price will tend to reach the upper limit in case there is lesser degree of competition while under conditions of free competition, the price will tend to be set at the lowest level. 4. Government and legal regulations: In order to protect the interest of public against unfair practices in the field of price fixing, Government can intervene and declare a product as essential product and regulate it's price. In such a case, the Government does not allow the firms to charge such a high price and intervene to regulate the price of the product.

5. **Pricing objectives**: Apart from profit maximisation, the pricing objectives of a firm may include: (a) Obtaining Market Share Leadership: If a firm's objective is to obtain larger share of the market; it will keep the price of its products at lower levels so that greater number of people are attracted to purchase the products; (b) Surviving in a Competitive Market: If a firm is facing difficulties in surviving in the market because of intense competition or introduction of a more efficient substitute by a competitor, it may resort to discounting its products or running a promotion campaign to liquidate its stock; and (c) Attaining Product Quality Leadership: In this case, normally higher prices are charged to cover high quality and high cost of research and Development.

6. **Marketing Methods Used:** Price fixation process is also affected by other elements of marketing such as distribution system, quality of salesmen employed, quality and amount of advertising, sales promotion efforts, the type of packaging, product differentiation, credit facility and customer services provided.

When Chandrashekhar Shukla returned to India after completing a Certificate course in Food Quality Assurance and Quality Control from the Netherlands, he was convinced that he would fulfil his grandfather's dream of converting their 58 acre land into a fertile farm. He started by setting out specific goals and laid down related activities to be performed to achieve the goals. Soon he launched his own company 'Food and Agribusiness Solutions Private Limited'. He sought to ensure that the future events effectively meet the best interest of the company. He prepared an annual statement for production and sales, based on sales forecasting. He noticed that the farmers grew only paddy due to which land remained idle for the subsequent 8 to 9 months of the year. He identified and assessed various alternatives through which farms could be utilised for the remaining months of the year.	4
	Through his accurate vision, judgement and systematic thinking based on analysis of the facts, he presented a scheme to the farmers where both paddy and vegetables could be grown.

33.	Leena has been appointed as the Operations Manager in a small trading company dealing in garments, with growing online sales. The company has recently rented space in a warehouse to store garments and mail out orders. In order to take over the responsibilities of order fulfilment, Leena promotes an associate, Kushagra to the post of Inventory and Order fulfilment Supervisor. Kushagra has been given the task to assess whether it is best to process orders as they come in or let them accumulate and then to process them in batches. He concludes that accumulating and then processing them in batches is the best way of fulfilling orders, in order to minimise cost and maximise customer satisfaction. Through several readings Leena finds that the standard time taken from the placement of order to the delivery of garments for a batch of 100 pieces is 72	6
